Art Unit: 3711

Prosecution on the merits of this application is reopened on claims 1-13 considered unpatentable for the reasons indicated below:

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5, 9-11, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nesbitt in view of Horiuchi et al. (Horiuchi). Nesbitt discloses the claimed invention with the exception of the particular materials utilized. However, one of ordinary skill in the art would, in view of Nesbitt's disclosure, recognize that other known materials could have been utilized in the invention so long as the cover comprised a harder inner layer overlaid by a softer outer layer. As disclosed by Horiuchi the use of high acid ionomers is known in the art. It would have been obvious to one of ordinary skill in the art to utilize the known materials disclosed by Horiuchi for their recognized advantages as noted by Horiuchi in the relationship suggested by Nesbitt to achieve a ball with such advantages.

Claims 6-8 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over the art as applied to claim 1 above, and further in view of Sullivan '814.

Nesbitt does not suggest his outer cover as being a blend of hard and soft ionomer. Blends of hard and soft ionomer are known to provide a balance of distance, spin, and durability not obtainable previously (see Sullivan Col. 3, lines 38-64). It would have been obvious to one

Art Unit: 3711

of ordinary skill in the art to have used a blend of hard and soft ionomer as Nesbitt's outer cover for the expected results.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claim 1 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,368,237. This is a double patenting rejection.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 5,803,831. Although the conflicting claims are not identical, they are not patentably distinct from each other because

Art Unit: 3711

removal of the additionally claimed limitations of the '831 claims with their corresponding loss of function would have been obvious to one of ordinary skill in the art.
